- Dec, 4th SS finals exams  
to 6th
- Dec, 15th Last School Day of the first semester

### Follow us

ISE Eastern Seaboard

International School Eastern Seaboard, Pattaya, Chonburi

As we quickly move towards the end of our first semester, with just four weeks left, it's a time of reflection and anticipation at ISE. Following our fantastic Family Fun Fair, organized by our dedicated PTA, our community is energized. This event not only showcased our unity but also brought immense joy to everyone involved.

After a brief break this weekend, our students and teachers are recharged and ready to tackle the final stretch of the semester. We're focused on supporting our students to achieve their best as we approach the end.

We also received important news this week: our Head of School and Allison will be with us until June. We are grateful for their dedication and look forward to working together for a strong finish to the school year.

Let's embrace the upcoming weeks with renewed energy and make the most of this semester!

## Family Fun Fair

Last Saturday, we had a fantastic Family Fun Fair at ISE! Our community came together to celebrate a special family day. It was a huge success with many visitors. Our students and alumni put on great performances, and there was fun for everyone. A big thank you to our PTA for organizing this wonderful event!

### Basketball @ ISE

Last Tuesday was a day of energy and skill on the basketball court for our U11 boys and U13 girls teams played against Regents School. They didn't win, but they showcased remarkable energy and clear improvement in their skills. Meanwhile, our U13 girls' team played two 3-on-3 games. They won the first game and lost the second. Both teams worked hard and did a great job, making us proud to cheer for them. Go ISE!

Students in grade 7 are preparing a 10-minute presentation about rational numbers. First, they will explain the definition of a rational number and its relation to integers and natural numbers. Secondly, they will cover operations with rational numbers, including addition, subtraction, multiplication, and division. Thirdly, they will explain how to determine whether a decimal expansion of a rational number terminates or not by using long division or a theorem they have studied in class. In the pictures, the students are seen preparing a one-page document containing their handwritten notes, which is the only assistance they are allowed to use during the presentation.

Students in grades six, seven and eight improve word knowledge by preparing word association posters as a way to build vocabulary and word connections within the mind. Learning is largely associative or connective, which simply means a powerful way of building new knowledge is to couple it with something we already know. Mind-mapping in color provides an entry point for knowledge enhancement.

## Open House Invitation

For new families interested in enroll  
their children

Next Friday, we're opening our doors to showcase our vibrant school community to new families. Invite your friends to be a part of this exciting journey. It's the perfect opportunity to gather information, visit our campus, and experience a day in the life of our students and teachers. Will be a day of discovery and connection!
